PREM MOHAN

QA Engineer | Test Automation | Azure DevOps | Playwright | Python | Selenium

High Wycombe, UK | +44 7587312297 | premmohan7733@gmail.com
Portfolio: prem-mohan-portfolio.vercel.app | linkedin.com/in/prem-mohan-b498a12ab | github.com/justforstories1998-eng

PROFESSIONAL SUMMARY

QA Engineer with 2 years of UK-based experience in automation and manual testing, and AI-assisted application development. Skilled in Playwright (TypeScript), Selenium WebDriver with Python, test planning, defect lifecycle management, and Azure DevOps. Experienced in Agile/Scrum including sprint ceremonies and 3 Amigos sessions, with working knowledge of CI/CD (YAML pipelines), Git-based version control, BDD concepts, Page Object Model (POM), and data-driven frameworks. Passionate about shift-left testing, software quality, and continuous improvement.

TECHNICAL SKILLS

- **Testing Types:** Automation, Manual, Functional, Regression, Smoke, Integration, UAT, End-to-End (E2E)
- **Test Automation:** Playwright (TypeScript), Selenium WebDriver (Python), Page Object Model (POM), Data-Driven Testing, BDD
- **API Testing:** REST API Testing, API Validation, Integration Testing
- **CI/CD & DevOps:** Azure DevOps (Boards, Test Plans), YAML Pipelines, Test Execution & Reporting in Pipelines, Git, GitHub
- **Programming:** Python, JavaScript/TypeScript, React, Node.js, MongoDB, HTML, CSS
- **QA Practices:** Agile/Scrum, Test Planning, Bug Tracking, Defect Lifecycle Management, Root Cause Analysis
- **AI Development:** AI-powered app development, Groq API (Llama 3.3 70B), EasyOCR, LLM integration

PROFESSIONAL EXPERIENCE

QA Engineer — Manual Testing, Automation Testing & AI Application Development

ACS, United Kingdom | Aug 2025 – Present

- Execute end-to-end manual and automation testing across multiple web-based applications to ensure quality, reliability, and alignment with business requirements.
- Design, develop, and maintain automated test scripts using Selenium WebDriver with Python and Playwright with TypeScript, applying Page Object Model (POM) and data-driven approaches to improve coverage and reduce regression effort.
- Create and manage test plans, test cases, test scenarios, and test data to support structured, repeatable, and scalable QA processes.
- Perform functional, regression, integration, smoke, and UAT testing; identify, document, and track defects through the full bug lifecycle with root cause analysis.
- Integrate test activities with Azure DevOps (Test Plans, Boards, work items, reporting); work with YAML-based CI/CD pipelines and test execution in pipelines.
- Participate in Agile/Scrum ceremonies — sprint planning, stand-ups, 3 Amigos, reviews, retrospectives — collaborating with developers, BAs, and product owners to define acceptance criteria.
- Independently design and build AI-powered applications using Python, React, Node.js, and MongoDB (maintained on GitHub), demonstrating strong programming and full-stack development skills.

QA Intern — Manual & Automation Testing

ACS, United Kingdom | Oct 2024 – Aug 2025

- Supported manual and automation testing across enterprise IT projects; created and executed test cases to improve coverage and enable early defect detection.
- Learned and applied Selenium WebDriver with Python for web automation; contributed to automation framework development.
- Partnered with cross-functional teams to analyse requirements and convert them into testable scenarios; participated in defect triage and bug tracking in Azure DevOps.
- Built foundational knowledge in Agile methodologies, Git/GitHub version control, and CI/CD fundamentals.

Customer Assistant

Marks & Spencer, United Kingdom | Sep 2024 – Feb 2025

- Delivered high-quality customer service in a fast-paced retail environment; strengthened communication, teamwork, problem-solving, and stakeholder collaboration skills.

KEY PROJECTS

TestCases-AI — Intelligent Test Case Generator | testcases-ai.vercel.app

React, Node.js, MongoDB, Groq API (Llama 3.3 70B), Azure DevOps Integration

- Built an AI-powered test case generator integrated with Azure DevOps, producing detailed test cases and step-by-step scenarios to accelerate QA workflows and improve test coverage consistency. Live demo at link above; portfolio includes

walkthroughs.

AutoTest AI — Automated Website Testing Engine (In Development)

Python, Selenium WebDriver, Groq AI, Web Crawling, HTML Parsing

- Developing an intelligent testing tool that accepts a URL, crawls the site with Selenium WebDriver, and uses Groq AI to dynamically generate and execute test scripts — applying AI-driven testing and self-healing automation concepts.

QA Test Manager — Test Management Application

React, Node.js, Azure DevOps Integration, Chart.js, PDF/Word Report Generation, Grok AI

- Built a production-ready QA test management app with Azure DevOps integration, real-time execution dashboards, pass/fail trend charts, AI-powered analytics, and automated PDF/Word stakeholder reporting.
