

PREM MOHAN

QA Engineer | Test Automation | Azure DevOps | Playwright | Python | Selenium

High Wycombe, UK | +44 7587312297 | premmohan7733@gmail.com | linkedin.com/in/prem-mohan-b498a12ab | github.com/justforstories1998-eng

PROFESSIONAL SUMMARY

QA Engineer with 1 year 10 months of UK-based experience in automation testing, manual testing, and AI application development. Skilled in Playwright, Selenium WebDriver with Python, test planning, defect lifecycle management, and Azure DevOps. Experienced in Agile/Scrum environments including sprint ceremonies and 3 Amigos sessions. Familiar with CI/CD pipeline integration, YAML-based pipelines, and Git-based version control. Exposure to BDD concepts, Page Object Model (POM), and data-driven test frameworks. Passionate about software quality, shift-left testing, and continuous improvement.

TECHNICAL SKILLS

Test Automation: Playwright, TypeScript, Selenium WebDriver, Python, Page Object Model (POM), Data-Driven Testing, BDD

Testing Types: Automation Testing, Manual Testing, Functional, Regression, Smoke, Integration, UAT, E2E Testing

API Testing: REST API Testing, API Validation, Integration Testing

CI/CD & DevOps: Azure DevOps, YAML Pipelines, Test Execution in Pipelines, Test Reporting, Git, GitHub

Programming: Python, JavaScript, React, Node.js, MongoDB, HTML, CSS

Frameworks & Tools: Agile, Scrum, Bug Tracking, Defect Lifecycle Management, Root Cause Analysis

AI Development: AI-powered application development, Groq API, EasyOCR, LLM integration

PROFESSIONAL EXPERIENCE

QA Engineer · Manual Testing, Automation Testing & AI Application Development

ACS, United Kingdom | Aug 2025 · Present

- Execute end-to-end manual and automation testing across multiple web-based applications to ensure quality, reliability, and alignment with business requirements.
- Design, develop, and maintain automated test scripts using Selenium WebDriver and Python, applying Page Object Model (POM) and data-driven testing approaches to improve test coverage and reduce regression effort.
- Create and manage test plans, test cases, test scenarios, and test data to support structured, repeatable, and scalable QA processes.
- Perform functional, regression, integration, smoke, and UAT testing; identify, document, and track defects through the full bug lifecycle with root cause analysis.
- Integrate test activities with Azure DevOps managing test plans, work items, and reporting; familiar with YAML-based CI/CD pipeline concepts and test execution in pipelines.
- Participate in Agile/Scrum ceremonies including sprint planning, stand-ups, 3 Amigos, sprint reviews, and retrospectives; collaborate with developers, BAs, and product owners to define acceptance criteria.
- Independently build AI-powered applications using Python, React, Node.js, and MongoDB, with projects maintained on GitHub · demonstrating strong programming and full-stack development skills.

QA Intern · Manual and Automation Testing

ACS, United Kingdom | Oct 2024 · Aug 2025

- Supported manual and automation testing activities across enterprise IT projects; created and executed test cases to improve test coverage and early defect detection.
- Learned and applied Selenium WebDriver with Python for web application automation testing; contributed to automation framework development.
- Worked with cross-functional teams to analyse requirements and convert them into testable scenarios; participated in defect triage and bug tracking using Azure DevOps.
- Built foundational knowledge in Agile methodologies, Git/GitHub version control, and CI/CD pipeline fundamentals.

Customer Assistant

Marks & Spencer, United Kingdom | Sep 2024 · Feb 2025

- Delivered high-quality customer service in a fast-paced environment; developed strong communication, teamwork, problem-solving, and stakeholder collaboration skills.

KEY PROJECTS

AutoTest AI · Automated Website Testing Engine (In Development)

Tech Stack: Python, Selenium WebDriver, Groq AI, Web Crawling, HTML Parsing

- Developing an intelligent automated testing tool that accepts a URL, crawls the site using Selenium WebDriver, and uses Groq AI to dynamically generate and execute test scripts — applying AI-driven testing and self-healing automation concepts.

TestForge AI – Intelligent Test Case Generator

Tech Stack: React, Node.js, MongoDB, Groq API (Llama 3.3 70B), Azure DevOps Integration

- Built an AI-powered test case generator integrated with Azure DevOps, producing detailed test cases and step-by-step scenarios to accelerate QA workflows and improve test coverage consistency.

QA Test Manager – Test Management Application

Tech Stack: React, Node.js, Azure DevOps Integration, Chart.js, PDF/Word Report Generation, Grok AI

- Built a production-ready QA test management application with Azure DevOps integration, real-time test execution dashboards, pass/fail trend charts, AI-powered analytics, and automated PDF/Word stakeholder report generation.

EDUCATION

MSc International Business Management | Oxford Brookes University, UK | Jan 2024 – 2025

B.Tech Mechanical Engineering | SRM Institute of Science and Technology, India | Jul 2019 – May 2023
